# **MENFP: Expression of interest note**

Home / Official Press Releases

The Ministry of National Education and Vocational Training (MENFP), a state body responsible for the education sector, intends to improve the quality of the educational offering.

Thus, the ministerial decision of June 14, 2023, revising the coefficients of compulsory subjects in official examinations and the introduction of ETAP, EEA, EC and EPS in the 9th Year Fundamental examinations, is an important step towards this objective.

To this end, the MENFP is launching a call for expressions of interest from teachers and professionals with skills for teaching these four new subjects.

The MENFP recalls that these four new subjects developed in the new curriculum of the third cycle of fundamental education aim to modernize education and better prepare students for the challenges of the 21st century.

They aim to enrich the educational experience of students and prepare them to become responsible and engaged citizens. In this perspective, it is essential that teachers are qualified, properly trained, for the implementation of this ministerial provision.

As the conditions were not favorable, on June 20, 2024, the MENFP had to postpone the integration of these four new subjects into the 9th AF exams for the 2024-2025 academic year.

As the reopening of classes approaches, the MENFP invites teachers and professionals with skills in these subjects to submit their application to the human resources department of the Departmental Directorates of Education (DDE) during the period from September 16 to 30, 2024.
